FOREWORD/HERD DETAILS

This special entry comprises 16 strong suckler cows with calves at foot. The majority of which are Charolais cross and Limousin cross, together with an odd native cow.

In addition, there is a batch of 13 in-calf heifers, including 5 pure Limousin heifers with the remainder being Charolais cross and Simmental cross, which are all 24-26 months of age and in-calf to the Charolais.

Within the cow and calf entry, all the dams are 1st to 4th calvers with the majority of the calves born in the last four months. The suckler cows receive no corn during the winter, with silage only fed and turn out occurred in late March.

All calves are by the Limousin or Charolais bull.

All cows have run with the Charolais bull since 4th May.

Male calves have not been castrated.

The cows received worming and boluses prior to turnout.

The cattle were TB tested on 11th May 2026. 6 month TB Parish

Purchasers note that the 13 in-calf heifers have been scanned in the last 3 weeks with the majority due July and August.
